

Laptop Locks

Deter theft by locking devices with lock slots to workstation anchor points. Unique keys and combination locks provide added security.

Three Security Slot Types

There are three main lock slot types: Kensington K-Slot/T-Bar, Nano, and Noble Wedge. Choose a compatible cable to secure your laptop or other devices such as monitors, docking stations, projectors, and drive enclosures.

Standard (K-Slot)

Original and most common type
(rectangular slot)

Nano

Newer and smaller type
(thin rectangular slot)

Noble Wedge

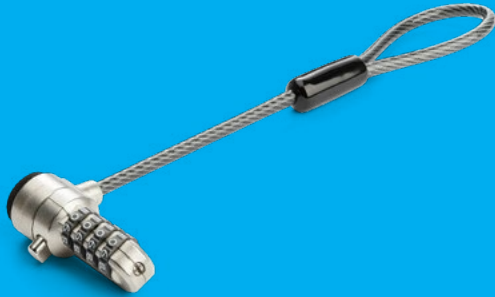

Newer and smaller type
(wedge slot)

Cable Lock Expansion

This Laptop Cable Lock Expansion Loop works with your base laptop lock (LTULOCKKEY or LTULOCK4D), to add a 6" (15 cm) extension cable and lock-head that connects into devices with the Kensington K-Slot.

You can use multiple laptop lock expansion loops to protect devices on your desk, or on display, while taking up little space. It's an ideal way to help prevent theft and tampering in areas with high foot traffic including retail, commercial, educational, and institutional environments.

Other Cable Lock Accessories

StarTech.com lock accessories offer an enterprise security solution, featuring durable construction & thoughtful design. These products help IT Pros easily secure a variety of devices wherever they are used.

LTANCHORL Laptop Cable Lock Anchor

Create a versatile and secure anchor point in almost any location.

KSLTAD Security Lock Slot Adapter Kit

Add a K-Slot to any device without an existing lock slot.
