1U 17" Rackmount LCD Console w/ Rear Mount KVM Switch Module

Product ID: 1UCABCONS17

This 1U Rackmount LCD KVM Console provides a complete keyboard, video and mouse control point, integrated neatly into only 1U of rack/cabinet storage space - a space efficient-solution that provides total KVM control right from a server rack.

The KVM Console combines a 17in TFT-LCD monitor, full 105-key keyboard and touchpad together into a durable, compactable design. When the console is not in use, it's as simple as folding the display and keyboard/mouse up (like a laptop computer) and sliding it back into the server rack on the sturdy mounting rails (included).

A highly scalable solution, the LCD console features a modular design that lets you install a multi-port KVM switch directly into the back of the console, allowing you to control multiple servers from a single point while only taking up 1U of rack space.

To simplify maintenance and ensure long-lasting performance, the console keyboard and touch pad are both replaceable - allowing you to swap out components as needed, without replacing the entire console.
