## Special Notes / Requirements

System and Cable Requirements	For a multi-monitor configuration, the computer must support MST. If the computer doesn't support MST, both displays will show the same video signal.
Note	USB 3.2 Gen 1 (5Gbps) is also known as USB 3.1 Gen 1

(5Gbps) and USB 3.0 (5Gbps).

Your laptop might have specific charging requirements. For example, if your laptop requires exactly 60W of power and an adapter consumes some of the 60W, your laptop might not recognize that it is getting enough power. For more information about Power Delivery, refer to the manufacturer of your hardware.

Qualcomm Snapdragon-based hosts are limited to dual 2560x1440 at 60Hz video.
