Refurbished 41U 29.5" Depth Enclosed Server Rack Cabinet

Product ID: 7230CABINETR

Refurbished units may have
minor scratches or dents.

The 7230CABINETR Refurbished 41U 29.5" Depth Enclosed Server Rack Cabinet is a high quality, lockable and dust-reduced environment for shallow (up to 27" deep) rackmount servers and network equipment.

With exterior dimensions of H75.5" x W22" x D29.5", this sturdy space saving unit is made from extruded aluminum for an appealing appearance. A lockable smoked plexiglass front door and solid aluminum rear door provide quick access to equipment. The internal front and rear mounting rails offer adjustable depth to fit virtually any piece of equipment that is less than 27 inches deep.

A standard roof-mounted triple motor AC fan unit and high-flow air filter below the rear door provide up to 300 CFM of bottom to top air flow through the cabinet, removing the heat produced by the enclosed equipment.

Every refurbished server rack includes complete mounting hardware and accessories as intended with the original (non-refurbished) product, and are provided in the original packaging. Refurbished units may have small scratches in the paint on the metal casing, but all other components are as new. Backed by a 90-day replacement warranty.

Certifications, Reports and Compatibility

Applications

• Data centers

• Industrial control centers

• Telecommunication closets

• Audio/Visual control centers

Features

• Extruded aluminum construction provides rounded corners and edges for an attractive appearance

• Fully forward/back adjustable threaded mounting rails inside cabinet

• Front and back doors are removable and can be switched to open left or right
