

Conference Room Docking Station with Power/Charging; Table Connectivity Box, Universal USB-C Laptop Dock, 60W PD, 4K HDMI, USB Hub, Audio, 1x AC Outlet, 2xUSB Charge Ports

**Product ID:** KITBXDOCKPEU

This conference table connectivity box bundle provides power and charging where it's needed and adds docking station capabilities to your boardroom, classroom or huddle space.

The StarTech.com bundle contains three products to equip you with a convenient out-of-the-box connectivity solution:

- Power outlet module (MOD4POWEREU)
- Laptop Docking Module (MOD4DOCKACPD)
- Dual-module conference table connectivity box (BOX4MODULE)

This tabletop power hub lets you power a laptop using the AC power outlet and charge phones and tablets using the 2.4 amp USB ports, directly from your conference table.

During meetings you may need to set up conference calls using applications such as Microsoft Teams, Zoom or Google Hangouts. Unlike other boardroom conferencing solutions that are limited to only one or two collaboration applications, this module lets you use your own laptop, so you are not restricted to a specific platform.

The boardroom USB-C docking station lets you collaborate with others in the room and around the globe. It lets you:

- Access your room's display, peripherals, webcam, speakers, mic and network
- Charge mobile devices using the USB-A charge port
- Power a supported USB-C laptop with USB-C power delivery

For users that are unable to dock or for quick access to the display, the front-facing HDMI port lets you connect a laptop directly to the display.

The conference table insert is easy to install and features a lid that closes to conceal connection points. Plus, the

cable organizer keeps cables accessible. The connectivity box can meet the needs of small, medium or large size rooms.

KITBXDOCKPEU is backed by a StarTech.com 2-year warranty and free lifetime technical support.

#### Special Notes / Requirements

Note	<p>Not all USB-C ports support the full functionality of the USB Type-C standard. Ensure that your host USB-C port supports USB Power Delivery 2.0 and DP alt mode.</p> <p>4K resolution is supported. A 4K-capable display is required to achieve 4Kx2K resolution</p> <p>If connected to a USB 2.0 host port, or if using a USB 2.0 host connection cable, performance may be limited (USB 3.0 host cable included)</p> <p>USB 3.0 is also known as USB 3.1 Gen 1; this connectivity standard offers speeds up to 5Gbps</p> <p>Cables with ferrites may impact cable maneuverability within the cable hole. If ferrites are required, we recommend using cables with ferrites that are positioned as close to the connector as possible</p> <p>The dock connects to the USB-C port on your laptop. The dock can also be connected to the USB-A port on laptops using a USB-B to A cable (included), but Power Delivery to charge your laptop is not available through USB-A</p>
