

Dual Monitor USB C Docking Station with 60W Power Delivery for Windows Laptops - USB C to HDMI / DVI Dock - USB 3.1 Gen 1 Type C Dock w/ Charging - Thunderbolt 3 Compatible

Product ID: MST30C2HHPDU

Enhance your productivity by turning your Windows USB-C laptop into a full-scale workstation. This dual-monitor USB-C dock lets you easily connect two HDMI monitors or DVI monitors (with included adapters) using one USB-C cable, with no setup of display drivers required, right out of the box. The USB-C dock provides 60W charging power, and five USB 3.0 ports to connect devices. With easy dual-monitor setup, the dock is ideal for wide-scale use in office workstations.

The USB-C dock lets you connect dual monitors with flexible options. Connect to:

- 2x HDMI or 2x DVI displays at 1920 x 1200p @ 60Hz
- 1x HDMI + 1x DVI display

You can also connect a single 4K HDMI display.

Unlike some USB-C docks that may drop to USB 2.0 and limit Ethernet performance, this USB Type-C dock offers full USB 3.0 and network bandwidth. This provides faster data transfer speeds when using your USB 3.0 peripherals and supports true Gigabit Ethernet network throughput.

This USB Type-C docking station gives you five USB 3.0 ports (1x USB-C and 4x USB-A including 1x Fast-Charge), a Gigabit Ethernet port (PXE Boot support), plus audio and microphone connections.

The USB-C docking station with Power Delivery will power and charge (up to 60W) your laptop, while powering your devices.

The dock features automatic driver installation for easy setup. It works with Windows based laptops with a USB-C port that supports DP Alt Mode and USB Power Delivery.

The MST30C2HHPDU, includes a free Windows application that enables you to better manage your enterprise network security. When you connect to your network through the ethernet port of the dock, the computer's MAC address is typically not broadcast to the network, as your network only sees the MAC address of the docking station.

However, the StarTech.com MAC Address Changer or Cloning software enables the USB-C dock to use MAC address spoofing of the connected Windows laptop rather than the MAC address of the dock itself. This ensures your network administrators have full visibility of each device on the network and can monitor and limit activity accordingly. To request access to our MAC Address Changer utility, please contact our Technical Support Department by phone, live chat, or e-mail.

The MST30C2HHPDU is backed by a StarTech.com 3-year warranty and free lifetime technical support.

Notes:

- Ensure your laptop's drivers, firmware, and operating system are current prior to using the docking station.
- Video output capabilities depend on the video card and hardware specifications of the connected laptop.
- Not all USB-C ports support the full functionality of the USB Type-C standard. Ensure that your laptop's USB-C port supports DP Alt Mode and USB Power Delivery for the full functionality of the USB Type-C standard.
- Not all Thunderbolt 3 USB-C ports support the full functionality of the Thunderbolt 3 standard. Ensure that your laptop Thunderbolt 3 port supports USB Power Delivery.
