

PS/2 to USB Keyboard and Mouse Adapter

Product ID: PS22USB

The PS22USB PS/2 to USB Keyboard and Mouse Adapter converts a USB keyboard and mouse to PS/2 connections allowing you to connect a newer USB-based keyboard and mouse to legacy systems that only have PS/2 connection ports available.

Newer USB keyboards and mice cannot simply use simple adapters to connect to PS/2 ports, as the signal is of a different nature, so active conversion is required for full functionality.

Supporting plug and play installation with no software or driver requirements, the PS/2-USB adapter offers a cost-effective way to bridge USB peripherals with a PS/2 based computer. For systems that have both PS/2 and USB connections, this compact device can also be used to free up 2 USB ports.

Backed by a StarTech.com 2-year warranty and free lifetime technical support.
