eSATA USB to SATA External HDD Dock for Dual 2.5 or 3.5in Hard Drive

**Product ID:** SATDOCK2UEGB

This dual drive SATA HDD Dock provides fast, convenient access to 2.5" or 3.5" SATA (SATA, SATA II, SATA III) hard drives (HDD) or solid state drives (SSD) through either USB or eSATA, without ever having to open a computer case or mount hard drives in an enclosure.

Supporting one or two drives (tested with up to 4TB 3.5" and 1TB 2.5" drives per bay), SATDOCK2UEGB can be connected to the host computer through either USB 2.0 or eSATA - then, it's just a matter of inserting the desired 2.5" or 3.5" SATA drives (or combination of both) into one of the two (or both) docking station slots for instant access.

The docking station supports plug and play installation on most operating systems, making it a perfect solution for data recovery, drive imaging, software testing, or any environment that requires fast access to massive amounts of data (uninstalled or archived hard drives etc.).  Plus, SATDOCK2UEGB features a small form factor design that requires minimal desk space for permanent connection to the host computer and provides enough hard drive surface exposure to optimize dissipation of operating heat.

SATDOCK2UEGB supports any 2.5" or 3.5" SATA drive, up to 2TB, and data transfer speeds of up to 1.5 Gbps (using eSATA) and 480Mbps (using USB 2.0) between host and dock - ensuring effortless data dumps or backups and hassle-free file transfers. Extend the value of this hard drive docking station, using a SATA to IDE hard drive adapter (SAT2IDEADP), which enables you to use any 2.5 or 3.5in IDE hard drive in a SATA hard drive dock slot.

## Certifications, Reports and Compatibility

## Applications

• Access spare or removed 2.5/3.5" drives quickly to retrieve data from

• Data recovery specialists who need quick access to drives for imaging

• Backup data quickly to an external drive for archiving

• Technicians who regularly test or benchmark different hard drives and need to swap between them

• Transfer data from one hard drive to another from the same dock

## Features
