

## VGA Wall Plate Video Extender Receiver over Cat 5

**Product ID:** STUTPRXWAL

This VGA Video Receiver Wall Plate can be used with StarTech.com's STUTP series of VGA over Cat5 extenders, allowing you to make out-of-the-way connections from a VGA video source to a remote VGA monitor. The receiver wall plate can be placed in a wall or ceiling gang for a cleaner, more professional VGA installation, supporting a connection distance up to a maximum of 300m (950ft) from the transmitter unit (not included).

Offering maximum versatility and convenience, the VGA wall plate is easy to install; simply wallmount the receiver unit near the intended VGA monitor, then connect the receiver to the corresponding transmitter unit. The VGA transmitter and receiver units can then be linked using standard Cat5e or Cat6 cable, providing a high quality video extension while concealing the cable for neater installation.

The VGA receiver wall plate uses a 12V DC terminal block connector behind the unit that offers a clutter-free installation; using Cat5/Cat6 cable to extend the VGA signal offers a cost-effective solution based on the broad availability of networking cable which is far more flexible than VGA cable, not to mention less expensive.

Unlike some video extension systems, our VGA extender wall plates also allow you to make use of an existing networking cable (Cat5, Cat6) infrastructure, eliminating the need to re-run cable in the event of an upgrade from VGA to another video standard, by simply swapping out the wall plates.

## Certifications, Reports and Compatibility

### Applications

- Ideal for applications in:<br>Education<br>Corporate<br>Digital Signage<br>Healthcare<br>Hospitality and Entertainment<br>Houses of Worship
- Ideal for Pro A/V installers and integrators looking for an easy solution to extend VGA video using Cat5 cabling.

## Features

- Use existing in-wall Cat5 cabling and save time for installations. Simply plug in the Cat5 cable into the RJ-45 connector and the cable is locked in.
- The STUTPRXWAL uses Cat5 cabling because it is lightweight, flexible, fits through small conduits.
- Powering the STUTPRXWAL uses a terminal block for a more secure connection.
- Compatible with UTPE series 4 and 8 port VGA video extender (ST124UTPE and ST128UTPE). Also works with the wall plate VGA video extender transmitter (STUTPTXWAL).
- Extend a VGA video signal to a maximum distance of 300m / 950ft. See specification for resolutions supported at various distances.
- Integrators and installers now have the choice of bulk rolls for custom length on field termination or using set lengths for quicker installs.

### Hardware

Warranty	2 Years
Ports	1
Cabling	Cat 5 UTP
Daisy-Chain	No

---

### Performance

Max Distance	300 m / 950 ft
Supported Resolutions	1920x1200 @ 50m(164ft) 1600x1200 @ 100m(328ft) 1280x1024 @ 180m(590ft) 1024x768 @ 200m(656ft) 800x600 @ 300m(984ft)

---

### Connector(s)

Connector Type(s)	RJ-45 Terminal Block (2 Wire) VGA (15 pin, High Density D-Sub)
-------------------	--

---

### Indicators

LED Indicators	Power LED
----------------	-----------

---

**Power**

Power Source	AC Adapter Included
Output Voltage	12V DC
Output Current	0.6A

---

**Physical Characteristics**

Color	White
Material	Steel
Product Length	4.1 in [10.5 cm]
Product Width	1.7 in [42 mm]
Product Height	1.5 in [38 mm]
Weight of Product	4.8 oz [136 g]

---

**Packaging Information**

Package Length	8.5 in [21.7 cm]
Package Width	2.8 in [72 mm]
Package Height	7.1 in [18 cm]
Shipping (Package) Weight	18.7 oz [530 g]

---

**What's in the Box**

Included in Package	VGA Video Extender Wall Plate Receiver
	Terminal Block for Power Adapter
	Power Adapter
	Instruction Manual

---
