

Wireless Presentation System - 1080p

Product ID: WIFI2HDVGAGE

This wireless presentation system is a video hub that lets you share the screen from your Wi-Fi enabled laptop, MacBook or Ultrabook on an HDMI or VGA display. It makes it easier than ever for users to collaborate and deliver presentations in boardrooms and office meetings, with intuitive controls and effortless screen sharing.

The presentation system features both HDMI and VGA outputs and supports resolutions up to 1920x1200 or 1080p. If you're looking to separate the audio from your HDMI video source, the wireless presentation system includes discrete RCA and TOSLINK audio outputs. As an added benefit the wireless video hub has a wired LAN connection enabling computers on your network that don't support Wi-Fi to collaborate, such as your media center or boardroom desktop.

The presentation hub can help you boost office productivity, by making it easier to collaborate and communicate. You can share and switch between up to eight different computers to view documents and multimedia content, which eliminates the disruption of each user having to connect and disconnect each time they want to present information from their laptop.

The system takes collaboration a step further, with innovative features that help capture in-meeting discussions and ideas. You can write and draw directly on the presentation content, or highlight important areas of focus with document markup capability.

The presentation system also lets you transfer documents to other meeting participants or download documents from cloud applications such as Dropbox, so you can annotate your presentation material then easily distribute the outcome of the discussion to your colleagues.

With the video hub, you can turn your VGA or HDMI television, monitor or projector into a wireless display.

In Collaboration mode, you can use the included nScreenShare software to quickly and intuitively share your display between different computers. The software works with both Windows and Mac computers, making it perfect for conference rooms and classrooms where different platforms may be used.

In Wireless Display mode, you can mirror any device that natively supports wireless display, such as your Android smartphone or tablet using AllShare Cast or Cast Screen applications, or your Windows 8.1 laptop, Ultrabook or Surface tablet. In Wireless Display mode, you don't have to install additional software, ensuring it will work for Bring

Your Own Device (BYOD) applications at your office.

Unlike some wireless video systems that are difficult to configure, the wireless presentation hub keeps your meetings running smoothly with a simple and intuitive user interface. The software features a Moderator mode, which enables you to assign a leader -- such as a teacher, instructor or meeting head -- to better organize the session and control who is allowed to present and share their screen.

Note: This product is not intended for high-definition video playback due to wireless network performance.

The WIFI2HDVGAGE is backed by a 2-year StarTech.com warranty and free lifetime technical support.

Certifications, Reports and Compatibility

Applications

- Enable your HDMI or VGA display to support wireless video
- Install in your office boardroom, to enable your employees or co-workers to share each other's screens on a larger display
- Use the Annotator feature to write or draw comments over the displayed content like a digital whiteboard
- Share and display documents with other meeting participants or download documents from the PC or cloud applications such as Dropbox

Features

- Share video wirelessly without the hassle of cables and clutter
- Collaborate with co-workers by easily switching between devices
- Intuitive operation with Windows and Mac computers
- Supports HDMI or VGA monitors, televisions and projectors
- Discrete RCA and TOSLINK audio outputs
- Wired LAN connection for support with computers that don't have Wi-Fi

Hardware

Warranty	2 Years
Ports	2
AV Output	HDMI

	VGA
Cabling	Wireless Ethernet
Audio	Yes
Industry Standards	IEEE 802.11n Draft 3.0, IEEE 802.11g
Daisy-Chain	No

Performance

Supported Resolutions	Standard: 1600x1200, 1280x1024, 1280x768, 1024x768, 800x600 Widescreen: 1920x1080, 1680x1050, 1440x900, 1366x768, 1280x800, 1280x720
Frequency Range	5 GHz ISM Bands (5.15-5.85 GHz) 2.4 GHz ISM Bands (2.412~2.484 GHz)
General Specifications	Note: 1080p video resolution is supported only on Intel HD Family Graphics Adapters (HD 2000 or above). All other graphics adapters will be limited to 720p.

Connector(s)

Connector Type(s)	USB Type-A (4 pin) USB 2.0
Connector A	Wireless N (IEEE 802.11n)
Connector B	HDMI (19 pin) VGA (15 pin, High Density D-Sub)

Software

OS Compatibility	Windows Vista, 7, 8, 8.1, 10 Android (v.4.3 and above) macOS 10.6 to 10.15, 11.0
------------------	--

Power

Power Source	AC Adapter Included
Input Voltage	100 - 240 AC
Input Current	0.3 A
Output Voltage	5 DC

Output Current 1 A

Power Consumption (In Watts) 5

Environmental

Operating Temperature 0C to 45C (32F to 131F)

Storage Temperature -20C to 60C (-4F to 140F)

Humidity 20%~60%

Physical Characteristics

Product Length 5.8 in [14.8 cm]

Product Width 3.4 in [87 mm]

Product Height 1.3 in [33 mm]

Weight of Product 6.3 oz [178 g]

Packaging Information

Package Length 11.6 in [29.5 cm]

Package Width 7.6 in [19.3 cm]

Package Height 2.8 in [70 mm]

Shipping (Package) Weight 18.1 oz [513 g]

What's in the Box

Included in Package	Presentation hub
	universal power adapter (EU / UK)
	quick install guide
